FUEL SAVING GREEN ENERGY

SOLUTIONS FOR CLUB MED KANI

BACKGROUND

For a paradise resort, securing a 100% reliable electricity supply is critically important. However, high fuel costs and dealing with technical difficulties may be diverting resources away from the resort's core business. It's time to cut power bills, lower technical complexity and reduce operating risk, all in one step.

ABOUT PROJECT

Fuel Saving Solutions for Club Med aims to modernize power supply by addressing the key geographical challenges of an island location.

ISLAND ENERGY CHALLENGES

- ❗ High fuel supply costs and price variability
 - ❗ Risk of hardware failure and delayed maintenance
 - ❗ Harnessing of local energy sources
 - ❗ Instability of hybrid renewable power systems
-

OBJECTIVES

YATEC offers Club Med a selection of solutions to radically upgrade its power supply model which achieve the following objectives:

- ☐ Net reduction in total energy-related expenditures
 - ☐ Higher dependability of power supply
 - ☐ Predictable pricing
 - ☐ Elimination of system operation and maintenance responsibilities from core business
-

SOLUTION TIERS

Three solution tiers offer different end-goals and may serve as a basis for a fully customized program.

A

DAYTIME FUEL SAVING MAX

Maximum fuel saving in daytime

PV output stabilization

B

24H FUEL SAVING WITH DIESEL BASE LOAD

Maximum fuel saving daytime and nighttime

Power output stabilization

Energy Storage System

Diesel Generator for base load only

C

CLEAN ENERGY RESORT WITH DIESEL BACK-UP

Maximum fuel saving in daytime and nighttime

PV output stabilization

Energy Storage System

100% base load by emission-free energy

WORKFLOW

Club Med can select between two cooperation variants with focus on either system ownership or energy subscription.

VARIANT 1: PRODUCT-BASED

Club Med purchases a power system from YATEC to provide fuel saving benefits.

- ✓ Club Med benefits from savings on lower fuel usage
- ✓ Club Med owns and operates all hardware

A custom designed turn-key power system

One-off payment for all hardware and engineering

Operation and Maintenance in-house by Club Med

VARIANT 2: SERVICE-BASED

Club Med purchases electricity from YATEC at predefined monthly rates.

- ✓ Club Med benefits from lower monthly electricity expenditures
- ✓ Club Med is guaranteed constant power supply without ownership responsibilities

An electricity supply agreement

Monthly payments based on power usage by Club Med

Operation Maintenance by YATEC
